

# Trajectory Generation

Research internship

---

Adrien Lafage

24.08.2021

ONERA

# Summary

- Introduction
- DBSCAN + GMM
- PCA + normal law
- PCA + kde
- Autoencoders
- Variational Autoencoder
- Vine Copula Autoencoder
- Metrics

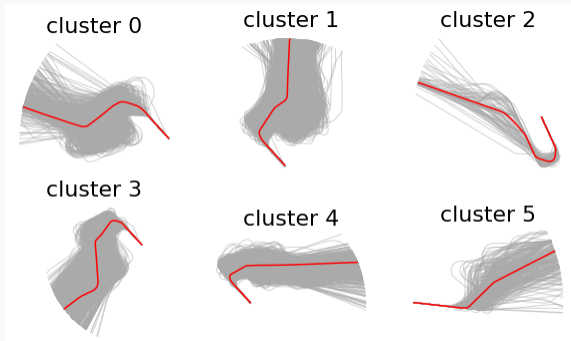

# Probabilistic Model

---

## 1. Clustering

- **Limitations:** noisy output

# DBSCAN + GMM

**Figure 1:** clustering

# Dimensionality reduction

# Deep Generative Models

---

# Variational Autoencoder
